A JOINT MASTERCLASS

Empowering Resilience: Labuan IBFC's Strategic Risk Management for Corporates

31 October 2025, 10AM (GMT +8) – Registration at 930AM

Venue: Pan Pacific Singapore
7 Raffles Boulevard, Marina Square, Singapore

Labuan IBFC together with Etiqa Offshore Insurance (L) Ltd will host a masterclass entitled "*Empowering Resilience: Labuan IBFC's Strategic Risk Management for Corporates*" on 31 October 2025 in Singapore.

In today's increasingly complex and volatile business environment, resilience is not just desirable—it's essential. This exclusive masterclass, jointly hosted by Labuan IBFC and Etiqa Offshore Insurance, will explore how corporates can take greater control of their risk strategies through alternative solutions, including Captive Insurance via wholly owned or rent-a-captive structures. Participants will gain valuable insights into Labuan IBFC's enabling regulatory framework, real-world applications linked to emerging risks such as climate change and cyber threats, and current market adoption trends across the APAC region.

As organisations across Asia face mounting challenges—from cyber incidents and climate-driven losses to rising employee-benefit costs and regulatory demands—this session will demonstrate how Labuan IBFC's progressive framework for Captive Insurance and Protected Cell Companies (PCCs) helps regional multinationals turn risk management into a strategic advantage. It will provide practical guidance on how captives can respond effectively in crises, complement traditional insurance, bridge coverage gaps, manage cost pressures, support sustainability goals, and deliver governance, compliance, and tax efficiencies—all while being structured and optimised as smart tools to strengthen organisational resilience.

Join us as we bring together leading experts from the (re)insurance and captive services space, who will shed light on innovative strategies and opportunities tailored to meet your organisation's risk management objectives.

Register now to discover how Labuan IBFC can help you build resilience and future-proof your risk strategy.

Who Should Attend:

CFOs, Risk Managers, Legal Advisors, Brokers, Insurance Consultants, and Corporate Strategists seeking effective and future-ready risk solutions.

as at 24 October 2025
