Advisory, MDEC*

*Irene Yong, Partner, Shearn  
Delamore*

New Economy Taxation (NET), IBFD Asia-Pacific, in association with IFA Malaysia and Labuan IBFC, are proud to present the Digital Economy Seminar on 16 July 2019 in Kuala Lumpur. This exclusive event follows the latest high profile proposals by the OECD Task Force on the Digital Economy and the G20 to change the international taxation norms to meet the challenges of the digitalized economy.

This KL meeting of multiple stakeholders will focus on how both businesses and tax administrations are reacting to and managing the disruptive effects of new and emerging business models and technology in Malaysia and the rest of Asia, including from the transfer pricing, indirect tax and customs valuation perspectives. Renowned speakers will discuss measures by the EU and various countries in the Asia-Pacific region to tax the digital economy and, closer to home, developments in Malaysia and Singapore will be examined on a comparative basis.

This seminar presents a unique forum for participants to interact with expert speakers from international tax policy and administration, industry business leaders, and top practitioners and academics, and to find a way forward in a highly uncertain world.
