ASSET CENTRE**

Labuan IBFC: Asia's Islamic Digital Asset Centre

The Islamic Digital Asset Centre (IDAC) is an initiative to establish a marketplace that allows and enables players to raise funds and invest funds digitally. The instruments that will be used in this marketplace are securities token offerings (STOs) – asset-backed tokens which allow illiquid assets to be liquid through digitalisation via a blockchain platform.

These STOs, or as known in Arabic, RAMZ, are Shariah-compliant. RAMZ are represented in digital format and recorded on a distributed digital ledger that is cryptographically secured.

Similar to Sukuk in Islamic capital markets, in the digital space, RAMZ will provide an alternative way of raising funds via tokenisation of assets. These assets can be any Shariah-compliant assets, including Sukuk.

IDAC provides a new avenue for fundraising and meeting investments goals for both issuers and investors. Issuers have an opportunity for listing on any of the international exchanges including Labuan approved exchanges.

A wide investor base is available from Islamic and conventional financial institutions, pension funds and fund management companies, including untapped retail high-net-worth investors amongst the global Muslim ummah.
